

Dustin Donaldson

BCBA | Educational Specialist | B.M. in Music Education | M.A. in Special Education | M.S. in Psychology (ABA) | Ed.S. in Teaching & Leading
Head of Behavioral Sciences – Super S.T.A.R.S.

My professional journey began with a love for education and a deep commitment to helping individuals with special needs realize their fullest potential. I hold a Bachelor's degree in Music Education from Georgia College and State University, a Master of Arts in Special Education from Piedmont University, a Master of Science in Psychology with a focus in Applied Behavior Analysis from Purdue Global, and an Educational Specialist degree in Teaching and Leading in Moderate to Severe Disabilities from Northe...

At Super S.T.A.R.S., I serve as the Head of Behavioral Sciences, where I have the privilege of overseeing care plans for individuals across a wide range of ages and levels of need. I specialize in behavior management strategies, discrete trial training (DTT), and verbal behavior programs designed to build communication, independence, and confidence in our clients.

Over the years, I've gained experience both in the public school system as a special

education teacher and in private, in-home therapy settings. These opportunities have allowed me to understand the importance of individualized, family-centered approaches rooted in evidence-based practices. I take pride in mentoring teams and collaborating with families to ensure that each child receives not only high-quality support but also genuine compassion and respect.

For me, this work is more than a career—it's a calling. I am inspired every day by the progress our clients make and the relationships we build together. At Super S.T.A.R.S., I'm proud to be part of a team that is research-driven, heart-led, and fully committed to empowering every child to shine.
